Day 13

3D Christmas Tree Centrepieces

Download the cutting files from craftwithsarah.com/CCC13

Supplies List

- Cricut machine / Silhouette / ScanNCut
- Standard grip cutting mat
- Kraft board
- Holographic card
- Collall All Purpose glue or similar
- Needle tip applicator bottle (optional)

Instructions

Full instructions with photos and a video are available at craftwithsarah.com/CCC13

- 1 Download the cutting files from the link above and unzip the folder
- 2 Upload the cutting files into your cutting machine software. For Cricut Design Space you **must** use the files that start SVG_ in the filename.
- 3 Resize the trees. I made mine 11.5 inches tall for the swirly tree.
- 4 Change the vertical cut lines to "score" lines and Attach them to the relevant card pieces.
- 5 Duplicate the tree so you have either three or four of them.
- 6 Cut out all of the layers from Kraft board or thick cardstock.
- 7 Valley fold the base pieces along the score line and glue them together.
- 8 Valley fold the decorative pieces. Put glue down the score line of the base pieces and stick the folded edge of the decorative pieces into the glue.
